

Multiple Choice Quiz

Q1. What is the name of the complex formed when TGF β binds with the C-terminal prodomain latency-related peptide (LAP)?

- | | |
|---|--|
| A | Small latency complex (SLC) |
| B | Large latency complex (LLC) |
| C | TGF- β binding protein 1 (LTBP1) |

Q2. Which Smad protein SMAD2 and SMAD3 to form a heterodimeric complex before translocating to the nucleus

- | | |
|---|-------|
| A | SMAD5 |
| B | SMAD4 |
| C | SMAD6 |

Q3. What is the name of the protein that promotes cell adhesion?

- | | |
|---|----------|
| A | Snail |
| B | BCL-2 |
| C | Cadherin |

Q4. Rho GTPases regulates which protein?

- | | |
|---|----------------|
| A | phosphoprotein |
| B | Actin |
| C | tropomyosin |

1) A
2) B
3) C
4) B
